

Supply Chain Conference a Resounding Success

The 1st Annual HSCN National Healthcare Supply Chain Conference was held in Toronto April 27-29, 2008 and according to all accounts, it was a resounding success.

A total of 220 Provider and Supplier delegate registered for this first ever conference in Canada and enjoyed being a part of many excellent leading practice presentations from incredible speakers from around the world. HSCN members are invited to review these presentations on the Members Area of our website at www.hscn.org

In addition, delegates had numerous opportunities to “network” with fellow supply chain professionals, speakers, sponsors and exhibitors during the two day event.

HSCN appreciates the generous support of our Platinum Sponsors, Cardinal Health, McKesson Canada and SAP. As well we thank our Gold Sponsors, Baxter, Bowers Medical, Medtronic and Ormed for their support. Our many other sponsors and exhibitors helped make this conference the success it was.

HSCN was pleased to partner with Rogers Publishing Canadian Healthcare Manager to present this conference and please watch for a complete report about this event in the summer issue of this magazine.

Finally, the 2nd Annual Conference is already being planned for late April 2009, so mark your calendars and stand by for details as they develop.
